Technical Skills

Languages & Frameworks: C#, .NET, JavaScript, TypeScript, Golang, React, Next.js, Node.js, NestJS, Tailwind CSS, tRPC, shadcn/ui

Databases: SQL Server, MySQL, PostgreSQL, MongoDB, SQLite (libSQL/Turso)

Concepts & Tools: OOP, LINQ, REST APIs, MVVM, MVC, Entity Framework, GORM, Drizzle ORM

Cloud & DevOps: Azure (Blob Storage), AWS (EC2, S3), Docker, Git, GitHub Actions, CI/CD, Vercel

Reporting & Integrations: Power BI, DAX, Swagger, Stripe, OAuth, Google APIs, Uploadthing, Resend

Development Practices: Agile/Scrum, Secure API Development, Unit Testing, Authentication (BetterAuth, OAuth, JWT, etc), Monitoring (Sentry)

Professional Experience

Full Stack Developer — Prodigitips

Jan 2024 – Present | Remote

- Led development of a premium vehicle rental marketplace using Next.js (App Router), TypeScript, Tailwind CSS, tRPC, and shadcn/ui, delivering a responsive, mobile-first platform with dark/light mode support.
- Built full-stack features including real-time vehicle availability checking, multi-step listing wizard, role-based dashboards (customer, owner, admin), and automated payout systems.
- Integrated Stripe for secure payments, Uploadthing for file uploads, BetterAuth for authentication, and Resend for transactional emails, ensuring seamless user experience.
- Implemented advanced search/filtering, review systems, KYC verification workflows, and analytics dashboards, improving platform usability and administrative control.
- Optimized performance with Bun runtime, Drizzle ORM on Turso (SQLite), and Sentry/Vercel monitoring, achieving fast load times and reliable scaling for growing user base.
- Deployed via Vercel with CI/CD pipelines, enabling rapid iterations in an Agile environment.

Full Stack Developer — E-MultiTech Solutions Pvt. Ltd.

Jan 2022 – Dec 2023 | Hybrid

- Developed full-stack applications using Nextjs, Nestjs, Golang, C# (.NET), JavaScript/TypeScript, and SQL databases in Agile/Scrum teams.
- Designed and maintained RESTful APIs and microservices for logistics and tracking systems.
- Implemented MVVM/MVC patterns to enhance code maintainability and separation of concerns.
- Optimized data layers with efficient SQL queries and ORM tools (Entity Framework, Prisma).
- Configured CI/CD pipelines using GitHub Actions and Docker for streamlined deployments.
- Collaborated with cross-functional teams to integrate systems and deliver high-quality features.

Selected Projects

Premium Vehicle Rental Marketplace (WeDrive)

Next.js, TypeScript, Tailwind CSS, tRPC, Drizzle ORM, Turso, Stripe, shadcn/ui

- Built a scalable marketplace connecting vehicle owners with customers seeking premium, all-wheel-drive vehicles suited for Canadian winter and mountainous terrain.
- **Developed customer features:** real-time search/availability, secure Stripe payments (CAD support), booking management, and review system.
- Created owner and admin dashboards for listings, earnings analytics, availability calendars, KYC verification, and payout processing.
- Deployed on Vercel with Sentry monitoring for performance and reliability.

AI-Powered Urban Planning Dashboard

Next.js, NestJS, PostgreSQL, OpenAI API

- Created an analytics dashboard with role-based access control and real-time data synchronization.
- Integrated external APIs for visualization, reporting, and cloud-based deployment.

WPF Employee Management System

.NET 8, C#, SQL Server, MVVM

- Designed desktop application for importing, editing, and managing employee records using WPF and Entity Framework.
- Implemented CRUD operations with optimized SQL Server queries and clean MVVM architecture.

B2B Marketplace Platform

Golang, React, PostgreSQL

- Developed scalable backend services with performance-optimized SQL queries.
- Built admin dashboard for order tracking, payments, and analytics.

Education

Conestoga College — Milton, Ontario
